

Reference Material Certificate

This reference material was manufactured to stringent quality control procedures at ISO 9001:2015 certified facilities.

Product Information

Product	Description	Batch
SA9005-0	Dispersing Agent	2310037001

Intended use

ASTM D8073, IP 624

Details

Description	Dispersing Agent—Toluene solution containing 1 mg /mL of solid (100 % dry) bis-2-ethylhexyl sodium sulfosuccinate.
Traceability	The certified values were determined by weight using a balance calibrated using UKAS calibrated weights and following procedure SA9005-0 Preparation.
Sample size	10 mL
Validity	12 months from first use
Storage	Store in a cool place away from direct sunlight.
Instructions for handling and use	It is the responsibility of the user of this verification material to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use. Consult test methods for correct use.
Description of material	99.9% Toluene
Health and Safety Information	Wear appropriate PPE. Consult SDS for further information.
Signatory	Duncan Black  
Signatory function	Quality Manager
